More specifically, the applicable LDR treatment standards must be met prior to placement. Just a semantic clarification.

Subject: CONVERSATION WITH DAVE BARTUS ABOUT IN-TRENCH TREATMENT

Bottom line:

It's illegal under LDR because waste is to be treated BEFORE it is placed in the landfill.

Treating it in-trench would be allowed if the MLLW trenches were land treatment facilities, not land disposal facilities (or under some arcane measures to prevent the waste from touching the land).

Suggestion: Dave will be in next week on Tuesday. Perhaps we should button-hole him then for more discussion.

What do you think?
